

# RETHINKING PLASTIC

STARTUP PLASTIC SURGERY

/ 2020

SPONSORSHIP PACKAGES

PANNON Pro Innovations has more than 6 years of experience in managing Hungarian greentech business development programmes. Through our startup programmes, we help idea owners to transform their greentech ideas into climate-positive businesses. In 2020 the newly launched accelerator, Startup Plastic Surgery, focuses on fighting against climate change through a complete life cycle recognition of plastic. Through the programme we support the selected ideas and solutions with industry specific mentoring and business coaching in their development into a market-ready enterprise.

The programme ends with a pitch competition at the ÖKOINDUSTRIA green expo, which is the leading international green economy expo in Central Europe for environmental technologies, products and services. Based on the professional jury's evaluation the best startups can be awarded with a fast track investment opportunity by HIVENTURES.

**Join us as supporting partner, and be part of the change!**
